

The background of the page is a large, stylized graphic composed of many hexagons. Most hexagons are a solid blue color, while several are a vibrant green. The hexagons are arranged in a pattern that tapers from the top right towards the bottom left, creating a sense of depth and movement.

# Quik

## WHITEPAPER

a marketplace for blockchain based  
NFT domains.

# ABSTRACT

Quik.com is a market platform solution for the trade of blockchain based NFT domains. The blockchain domain name industry is still untapped and we believe that blockchain based NFT domain names will be a huge part of the web 3.0.

The blockchain domain name industry, while being massively successful and booming, suffers from problems like lengthy payments, delays in delivery and unavailability of a transaction history. These hindrances can be the cause of slowing down its growth. Here is where Quik.com will enter with a solution. It will be a P2P marketplace for blockchain based NFT domains with all transactions happening on the blockchain. This will ensure efficient transactions as well as a completely transparent process with a complete transaction history available at all times.

Quik.com targets to become the #1 blockchain domain name marketplace by becoming the top platform for the listing, purchase and sale NFT domain names. Our vision is to provide a transparent platform through the inculcation of blockchain transactions where anyone can list, sell and buy nft domains in a pleasing experience as a whole.

All transactions on the platform will occur in ETH, BNB or QUIK over protocols such as ETH-721, 1155 and BEP-721, 1155 after the launch. Later on, with the passing of time, more protocols will be added accordingly.

The advantage of Quik.com over its competitors would be that it will be a dedicated blockchain transaction platform, a first of its kind to breach the blockchain domain name industry.

Like the „.com“ frenzy, blockchain domains are the latest fever in the crypto world. Even though these blockchain domain names are called the crypto version of internet domain names, they are completely different.

A traditional domain name represents a particular IP, the Internet Protocol address for a website accessible through the traditional internet.

On the other hand, a blockchain domain, like „Quik.shib“ links to an address on a blockchain network via an NFT offered by a blockchain domain name service like Quik.com.

These NFT domains are not part of ICANN and traditional DNS. Instead of just serving as a web address, they replace wallet addresses that are long and complex and offer personal identities on a decentralized internet. NFT domains are also owned, not rented.

**NOTE:** Quik plans to develop its web extensions and web browser in the future and the blockchain domain names available on Quik.com shall only be useable after the launch of these extensions and browser. The web extension shall allow users to host their decentralized websites and use their domain names as their cryptocurrency wallet addresses.

**Risk Disclaimer:** Buying Blockchain Domain Names involves substantial risk of loss and is not suitable for every investor. The valuation of the Blockchain Domain Names may fluctuate, and, as a result, clients may lose more than their original investment and can even result in total loss of capital. Before deciding to buy Blockchain based NFT Domain Names, you should carefully consider your investment objectives, level of experience, and risk appetite.

# OUR PITCH

## **Quik: Open Blockchain Market for Domain Name Trade**

According to industry experts, as the NFT market hit a mind-boggling 22 billion dollars in the year 2021, it is likely to continue rising at an exponential rate in the next years. By the end of each day, the market has demonstrated an increase in their growth potential of the Blockchain based NFT Domain Names.

Blockchain based NFT Domain Names are not a part of the ICANN and traditional DNS, rather are links to an address on a blockchain network via an NFT. So these Blockchain Domain names will not only help the owners to host decentralized websites through the Quik web extension and browser, but will also serve as wallet addresses in future.

This widespread consumer and business use make blockchain domains a significant asset class for private key wallet ownership. The blockchain based NFT domain can be stored in your cryptocurrency wallet, and you can transfer it to someone else or to a different wallet whenever you want. Once you mint or buy an NFT domain name from Quik.com, you become the sole owner of the domain name and you reserve the right to transfer or sell the domain name to another use.

With all transactions taking place on the blockchain, Quik.com will function as a peer-to-peer NFT domain marketplace. This would allow for more efficient transactions, as well as a completely transparent method with a transaction history that is always available to the user.

Quik.com aspires to be the world's largest nft domain name marketplace. Our objective is to create a transparent platform through the incorporation of blockchain transactions that allows anybody to list, sell, and buy digital goods in a pleasant environment.

With a robust roadmap with well defined steps and proactive marketing strategies, Quik.com will fill in a void in ways that will be beneficial to the entire industry as whole.

Quik.com will serve as the perfect solution towards blockchain based P2P trading involving digital assets of various kinds. With a dedicated team working behind it at all times, Quik.com will become a major competitor in the industry in the years to come.

**NOTE:** The users of Quik.com, or the Quik Platform should never confuse Blockchain based NFT Domain Names with the traditional domain names as these are two completely different terms. The NFT Domain names will only be useful through the Quik web extension and web browser and shall not serve as normal website urls like the traditional domain names.

The information set below may not be exhaustive and does not imply any elements of a contractual relationship. While we make every effort to ensure that any material in this whitepaper is accurate and up to date, such material in no way constitutes the provision of professional advice. QUIK.com does not guarantee, and accepts no legal liability whatsoever arising from or connected to, the accuracy, reliability, currency, or completeness of any material contained in this Whitepaper. Potential Blockchain Domain Name holders should seek appropriate independent professional advice prior to relying on, or entering into any commitment or transaction based on, material published in this paper, which material is purely published for reference purposes alone. QUIK.com does not provide any opinion on any advice to purchase, sell, or otherwise transact with Blockchain Domain Names and the fact of presentation of this paper shall not form the basis of, or be relied upon in connection with, any contract or investment decision. No person is bound to enter into any contract or binding legal commitment in relation to the sale and purchase of Blockchain based NFT Domain Names on the Quik platform, and no cryptocurrency or other form of payment is to be accepted on the basis of this paper.

### **Regional Restrictions:**

You are not eligible and you are not to purchase any Blockchain Domain Names on the Quik platform if you are a citizen or resident (tax or otherwise) of Singapore, or other Singapore Person. "Singapore Person" is generally defined as a natural person, residing in the Singapore or any entity organized or incorporated under the laws of Singapore.

You are not eligible and you are not to purchase any Blockchain Domain Names if you are a citizen or resident (tax or otherwise) of the People's Republic of China („PRC“), or other PRC Person. „PRC Person“ is generally defined as a natural person, residing in the People's Republic of China, or any entity organized or incorporated under the laws of the People's Republic of China.

Furthermore because of current regulatory uncertainty and before additional information is publicly released by the Platform on the matter, green card holders of the United States or citizens or residents (tax or otherwise) of the United States of America, Singapore or China, or other U.S., Singapore Person or PRC Person, are not eligible to buy any blockchain domain names on the Quik platform. That limits the ability of U.S., Singapore, PRC persons to utilize blockchain domain names and participate in the future development of the platform as well as in the distribution of proceeds.

You are not eligible and you are not to purchase any Blockchain Domain Names if you are a citizen or resident (tax or otherwise) of the Republic of India or India, or any entity organized or incorporated under the laws of the Republic of India.

# INTRODUCTION

# BLOCKCHAIN DOMAIN NAMES

## What are Blockchain Domains?

Like the „.com“ frenzy, blockchain domains are the latest fever in the crypto world. Even though these blockchain domain names are called the crypto version of internet domain names, they are completely different.

A traditional domain name represents a particular IP, the Internet Protocol address for a website accessible through the traditional internet.

On the other hand, a blockchain domain, like „Quik.shib“ links to an address on a blockchain network via an NFT offered by a blockchain domain name service like Quik.com.

These NFT domains are not part of ICANN and traditional DNS. Instead of just serving as a web address, they replace wallet addresses that are long and complex and offer personal identities on a decentralized internet. NFT domains are also owned, not rented.

## What are Blockchain Domains used for?

Blockchain Domain Names can be used to host a website using browser extensions and a custom web browser developed to host the same. Also, these domain names shall also serve as cryptocurrency wallet addresses to replace long alphanumeric characters. However, the blockchain domains on Quik.com shall only come in use once Quik launches its browser extensions and web browser.

# NON FUNGIBLE TOKENS

## What are Non Fungible Tokens?

Non-Fungible Tokens or NFTs are cryptographic assets based on blockchain technology. Unlike cryptocurrencies, fungible tokens are identical; NFTs come with unique identification codes and metadata that differentiate them from one another. Hence, they cannot be used as a medium for commercial transactions or exchanged at equivalency.

The distinct construction of each NFT has several potential use cases. Its most prominent use cases include a digital representation of physical assets such as artwork and real estate.

Furthermore, since NFTs are based on blockchains, they can remove intermediaries and create new markets that directly connect artists with audiences. NFTs can also be used for identity management.

## NFT Stats

NFTs have been around for less than a decade and have become a new way to prove ownership over digital goods.

They have recently gained prominence in the art market. One NFT sold in 2020 valued at nearly 69 million USD, making it one of the most expensive digital item traded on any platform in history.

Every week, about 0.01 to 20 million USD worth of NFTs are sold in the Blockchain. The total value of NFT sales stood at approximately 250 million USD last year.

# BLOCKCHAIN TECHNOLOGY

## What is blockchain?

A blockchain is a distributed database stored electronically in a digital format and shared among the computer network nodes. It is best known for its critical role in cryptocurrency systems such as Ethereum and Bitcoin for maintaining a decentralized and secure transactions record.

The innovation of Blockchain is that it assures the security and fidelity of a data record, generating trust without any trusted third party. It consolidates information in groups, called „blocks“ that contain information sets. Blocks have certain storage capacities and, when full, are closed and linked to the previously filled block. It creates a chain of data called the „Blockchain.“

All new data that follows that newly added block has compiled into a newly made block added to the chain once saturated.

## Distributed Ledger

A distributed ledger is a set of information consensually shared and synchronized across multiple geographies, institutions, or sites, accessible by multiple users. It allows transactions to have public „witnesses.“

The participant at each network node can access the records shared across the network and own an identical copy of it. Any additions or changes made to the ledger are reflected and copied to all participants in a matter of minutes or seconds.

It stands in contrast to a centralized ledger, which is more prone to fraud and cyber-attacks because of its single point of failure.

# USES OF BLOCKCHAIN BASED NFT DOMAIN NAMES

From a business owner's perspective, one critical difference between traditional domains and blockchain is independence from any DNS-related rules. More, blockchain domains enforce brand rights. Once a blockchain domain is distributed to an owner, only that owner can transfer its own, which is not the case with traditional domains.

You can only use these domains within the Quik ecosystem, accessible via the Quik web browser and extension.

A traditional domain name represents a particular IP, the Internet Protocol address for a website accessible through the traditional internet. On the other hand, a blockchain domain, like „Quik. shib“ links to an address on a blockchain network via an NFT offered by a blockchain domain name service like Quik.com .

These NFT domains are not part of ICANN and traditional DNS and shall never be compared to a traditional domain name,

Traditional payment methods are being replaced with modern ones such as cryptocurrencies, and today, making payments with cryptos such as Bitcoin, ETH or BNB is far quicker and easier than any traditional payment system, and since all the cryptocurrency transactions happen on the Blockchain, it remains transparent, permanent, and secure, allowing users to directly connect with prospects, removing any need for third parties.

# BLOCKCHAIN DOMAIN NAME MARKET ANALYSIS

The registration of blockchain domain names is also at an unprecedented speed. The registration rate as of May 2021 was more than 500% YoY, with no sign of slowing down.

So far, ENS has hit a market cap of more than 1 billion USD.

(ENS Market Cap, USD, Source: CoinMarketCap)

# NFT MARKET ANALYSIS

In 2020, the NFT market tripled, with the total sales volumes traded in NFTs reaching 250.84 million USD from 159.14 million USD in 2018.

The total number of active wallets, crypto wallets that interacted with an NFT Smart Contract, increased from 110,552 wallets in 2018 to 222,179 wallets in 2020, a 97.09% increase from 2019.

In 2020, there were more than 74,529 NFT buyers and over 31,504 NFT sellers. There has been a considerable leap in the market cap for international transactions to 338.04 million USD in 2020 from 40.96 million USD in 2018.

**Quik**

# QUIK.COM

Quik.com is a marketplace for blockchain based NFT domain names, Users can trade these assets with ETH, BNB or QUIK.

We believe the blockchain domains market is still untapped and can raise endless opportunities.

Blockchain domain names have the power to change people's perception of domain name ownership. The combination further adds a layer of transparency, permanent ownership, functionality, and security.

Each of the Blockchain Domain Name on Quik.com comes with a unique NFT artwork attached to it when the NFT Domain is minted. These artworks are works of excellent artists from around the world and each of these artworks are 100% unique, that means no other similar artwork exists..

We focus on connecting blockchain domain name sellers and buyers on the platform in the most convenient way possible and plan to record such transactions between the buyers and the sellers on a distributed P2P (Peer-To-Peer) system validated by network participants. The cost-effective, quick, and transparent blockchain-based transactions make Quik a unique and modern platform.

The nexus at which Quik is currently sitting has the potential to build a different kind of incentive structure. It will usher in a new era where users hold control over their data.

There are many use cases of blockchain domain names. It includes but is not limited to building decentralized websites, online portals, connecting them to other social media accounts, and setting real-time communications.

Likewise, with crypto and Metaverse entering the mainstream at a gradual pace, the blockchain-based domain names are set to witness high demand and growth.

We look at blockchain domain names as the gateway to NFTs, with various opportunities rising with it. Therefore, we are dedicated to empowering users and businesses to enter the market with our fast, cost-effective, and secure infrastructure.

# MISSION OF QUIK.COM

Easy payment  
system

## Quik Marketplace

Quick  
payments

We aim to be a gateway for the Web 3.

New-era businesses are moving away from Web 2.0, a centralized system, to a more secure, decentralized, permissionless, scalable, permanent, and easily transferable Web 3.0.

Quik.com will enable users to trade digital assets including blockchain based NFT domains with ease. The emergence of the decentralized web allows people to own their digital assets and data. In other words, it allows people to reclaim their freedom which was they had to give up while jumping from Web 1.0 to 2.0.

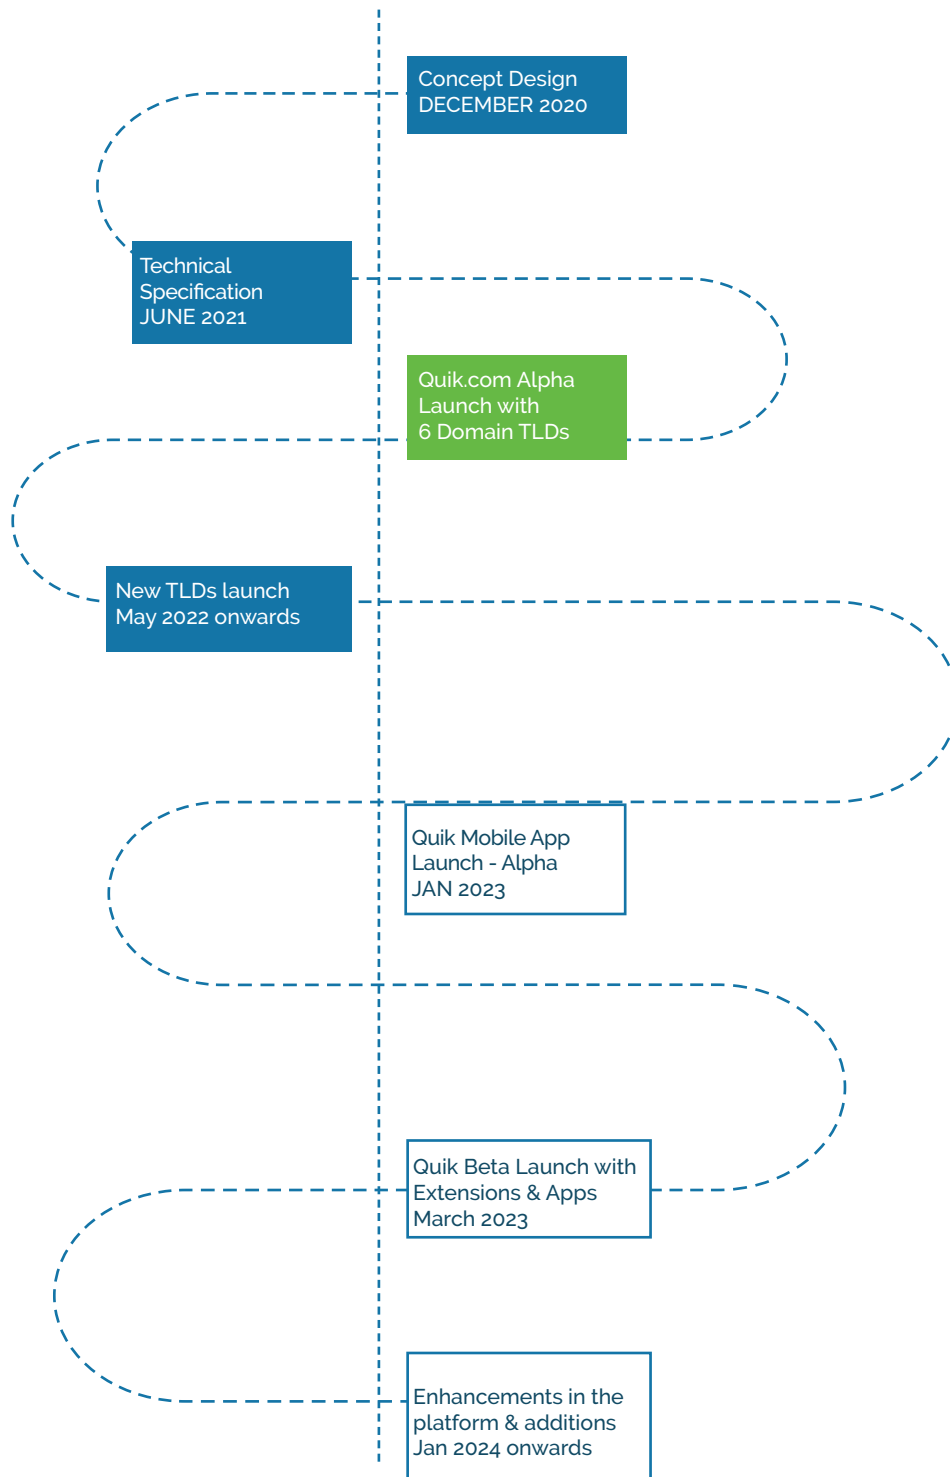

While experts are still uncertain about how the internet would evolve and move towards decentralization, there is a unified agreement that it would eventually become a ubiquitous part of our existence.

We see the rise of blockchain domain names as an opportunity to build the internet free from its present constraints.

# TECHNICAL ROADMAP

## RISKS

Quik.com platform users should carefully read all the information, understand and analyse the risk related factors, before deciding to participate in the investment and purchase of Blockchain Domain Names.

The purchase and any other acquisition of NFT or Blockchain Domain Names carries with it significant risk. Prior to participation, carefully consider the potential risks and, to the extent necessary, consult a lawyer, accountant, and/or tax professional to evaluate the risk entailed. Do not over-commit.

We make no promises of possible gains or returns. You can potentially lose all your money if the market price drops to zero. The Blockchain Domains on the Quik platform currently run on the Ethereum Blockchain, and Quik plans to integrate domain names on other blockchains such as Binance Chain, Gate Chain etc in future. You must access and use the current blockchain domain names using an ERC20-compliant wallet. It is your responsibility to not lose your NFT Domains.

This is early-stage project finance. The team is unproven. The market is unpredictable. It is possible that even if the sale threshold is met, funds won't be sufficient to feasibly develop the Quik.com system or there could be enough execution error to cause the project to fail. By holding Blockchain Domain Names, the acquirer acknowledges that he/she understands that while every effort will be made to execute Quik.com's vision for the Quik.com platform system, it is possible that it will never be realized.

Cryptocurrencies and project financing through cryptocurrencies have been the subject of regulatory scrutiny by various regulatory bodies around the world. Quik.com and the Quik.com project may need to change their operations to comply with applicable regulation, and they may become subject to licensing requirements. The Blockchain Domain Names could be impacted by one or more regulatory actions or regulatory enforcement, which could impede or limit the ability to continue to develop the QUIK platform. This uncertainty significantly adds up to risks connected with the acquisition and use of the Blockchain Domains. Quik.com will make effort to adopt its practices to accommodate regulatory needs and changes as they occur.

The field of digital cryptography is very new and for this reason there is a risk of unforeseen attacks on several or all parts of the Quik.com platform and system.

Owing to the market prospective, holding and purchasing Blockchain Domains can be a risky and speculative investment. By purchasing, holding and using Blockchain Domain Names, the user, investor or anyone holding the Blockchain Domain clearly recognize and presume the risks which are likely to be:

- 1 Risk of losing access to NFT Domains due to loss of Private keys, or any kind of custodial or purchaser errors.
- 2 The user needs to have a private key, or a combination of private keys, which is necessary to control and dispose of Blockchain Domain Names stored in your digital wallet.
- 3 Because of Owing to the market risks and unprecedented nature of the crypto world, the investments can become zero.

- 5 The Blockchain Domain Names can be significantly and unfavorably affected, if it fails to efficiently administer its procedures, as its business builds up and progresses, which would have a straight blow on its capability to maintain the Quik.com platform or even to launch any other future platforms.
- 6 Risks arising from lack of governance rights or any changes made to put restrictions over the cryptocurrency utilization.
- 7 Risk of mining attacks, uninsured losses, from taxation, uncertain regulations and enforcement actions, associated with markets for Quik Blockchain Domain Names etc.
- 8 Risks arising from dissolution of the company, unfavorable fluctuation of Bitcoin, BNB values, Ethereum Network, hacking, cyber attacks and security weaknesses
- 9 Risks associated with the Ethereum Blockchain protocol, because QUIK tokens are based on the Ethereum Blockchain protocol, any malfunction, breakdown or abandonment of the Ethereum Blockchain protocol may have an adverse effect on the platform or Blockchain Domain Names.
- 10 General global market and economic conditions may have an adverse impact on QUIK's operating performance, results of operations, and cash flows.
- 11 Investing in Quik.com's Blockchain Domain Names can be risky because of the uncertainties in the initial stages.
- 12 QUIK Blockchain Domain owners can lose their investments if owing to the Blockchain Domains falls to zero, by any means of market forces.
- 13 The risks related to the Blockchain Domain investments should be carefully analysed, and speculated correctly, so as to avoid any hassles after or during the Domain Minting stages.

# NOTICE, TERMS & CONDITIONS, AND DISCLAIMER

The Blockchain based NFT Domain Names are not intended to constitute securities in any jurisdiction. This Whitepaper/Website does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction.

No person is bound to enter into any contract or binding legal commitment in relation to the minting or buying of the blockchain domain names and no cryptocurrency or other form of payment is to be accepted on the basis of this Whitepaper/Website.

The information set below may not be exhaustive and does not imply any elements of a contractual relationship. While we make every effort to ensure that any material in this whitepaper/website is accurate and up to date, such material in no way constitutes the provision of professional advice. Quik.com does not guarantee, and accepts no legal liability whatsoever arising from or connected to, the accuracy, reliability, currency, or completeness of any material contained in this whitepaper/website. Contributors and potential blockchain domain name holders should seek appropriate independent professional advice prior to relying on, or entering into any commitment or transaction based on, material published in this whitepaper or website, which material is purely published for reference purposes alone.

Quik.com does not provide any opinion on any advice to purchase, sell, or otherwise transact with blockchain based NFT domain names and the fact of presentation of this whitepaper/website shall not form the basis of, or be relied upon in connection with, any contract or Contribution decision. No person is bound to enter into any contract or binding legal commitment in relation to the swap or purchase of blockchain domain names, and no cryptocurrency or other form of payment is to be accepted on the basis of this white paper.

## **Regional Restrictions:**

You are not eligible and you are not to purchase any blockchain domain names if you are a citizen or resident (tax or otherwise) of Singapore, or other Singapore Person. "Singapore Person" is generally defined as a natural person, residing in the Singapore or any entity organized or incorporated under the laws of Singapore.

You are not eligible and you are not to purchase any blockchain domains if you are a citizen or resident (tax or otherwise) of the People's Republic of China („PRC“), or other PRC Person. „PRC Person“ is generally defined as a natural person, residing in the People's Republic of China, or any entity organized or incorporated under the laws of the People's Republic of China.

You are not eligible and you are not to purchase any blockchain domains if you are a citizen or resident (tax or otherwise) of the Republic of India or India, or any entity organized or incorporated under the laws of the Republic of India.

Furthermore because of current regulatory uncertainty and before additional information is publicly released by the Platform on the matter, green card holders of the United States or citizens or residents (tax or otherwise) of the United States of America, Singapore, India or China, or other U.S., Singapore Person or PRC Person, are not eligible to buy blockchain domain names. That limits the ability of U.S., Singapore, PRC persons to utilize blockchain domains and participate in the future development of the platform as well as in the distribution of proceeds.

## **NO ADVICE**

No information in Quik.com website or Whitepaper should be considered to be business, legal, financial or tax advice regarding Quik.com, the Distributor, the Blockchain Domains, the NFT Domains minting, the QUIK Platform, and the QUIK.com marketplace (each as referred to in the Whitepaper). You should consult your own legal, financial, tax or other professional adviser regarding Quik.com and/or the Distributor and their respective businesses and operations, the Blockchain Domain Names, the NFT Domain Names, the QUIK Blockchain based NFT Domains, and the QUIK Domain Names based on Blockchain, the QUIK.com marketplace (each as referred to in the Whitepaper). You should be aware that you may be required to bear the financial risk of any purchase of Blockchain Domain Names for an indefinite period of time.

## **Limitation of Liability**

In no event shall Quik.com, members of Quik.com staff, contractors, or volunteers be liable for:

Any lost profits, lost savings or incidental, indirect, special or consequential damages, arising out of your use or inability to use the services or products offered by Quik.com or the breach of any of these Terms by any third party;

Any security risk such as hacker attacks, loss of password, loss of private key, or similar.

Mistakes or errors in code, text, or images involved in the swap.

Any losses resulting from the volatility in pricing of the Blockchain Domains in any countries and cryptocurrency exchanges.

This website and the Blockchain Domains are provided on an "as is" basis and without any warranties of any kind, either expressed or implied. You assume all responsibility and risk with respect to your use of the website and purchasing of any amount of the Blockchain Domains and their use. If applicable law does not allow all or any part of the above limitation of liability to apply to you, the limitations will apply to you only to the extent permitted by applicable law.

By acquiring Blockchain Domain Names and to the extent permitted by applicable law, the buyer agrees not to hold QUIK.com, Blockchain Domains or any employee or contractor of QUIK liable for any losses or damages arising out of or in any way connected to the buyer's failure to properly secure the private key to the wallet containing their Blockchain Domains: hacker's attacks, stolen devices, loss of passwords, etc.

## **No Liability**

Quik.com and/or the Distributor does not make or purport to make, and hereby disclaims, its liability for:

- (a) any person participating in the Minting/Buying, in violation of any anti-money laundering, counter-terrorism financing or other regulatory requirements that are imposed in any jurisdiction;
- (b) any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in this Whitepaper.

## Representation & Warranties by you

By accessing and/or accepting possession of any information in Quik.com Whitepaper or such part thereof (as the case may be), you represent and warrant to QUIK Blockchain Domains and/or Quik.com (the Distributor), as follows:

- (a) you agree and acknowledge that the QUIK Blockchain Domains do not constitute securities in any form in any jurisdiction;
- (b) you agree and acknowledge that this Whitepaper or website does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities in any jurisdiction or a solicitation for investment in securities and you are not bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of this Whitepaper or Quik.com website;
- (c) you agree and acknowledge that no regulatory authority has examined or approved of the information set out in this Whitepaper or Quik.com website, no action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction and the publication, distribution or dissemination of this Whitepaper or Quik.com website to you does not imply that the applicable laws, regulatory requirements or rules have been complied with;
- (d) you agree and acknowledge that this Whitepaper or Quik.com website, the undertaking and/or the completion of the minting of Blockchain Domains, or future trading of the Blockchain Domains on any platform, shall not be construed, interpreted or deemed by you as an indication of the merits of the Quik.com platform and/or the Distributor, the QUIK Blockchain Domains, the QUIK NFT Domains, the Minting of Blockchain Domains, and the Buying and selling of NFT Domain Names (each as referred to in this Whitepaper);
- (e) the distribution or dissemination of this Whitepaper, any part thereof or any copy thereof, or acceptance of the same by you, is not prohibited or restricted by the applicable laws, regulations or rules in your jurisdiction, and where any restrictions in relation to possession are applicable, you have observed and complied with all such restrictions at your own expense and without liability to Quik.com and/or the Distributor;
- (f) you agree and acknowledge that Quik.com reserves the right to conduct "know your customer" exercise and any other kind of customer due diligence on purchasers at any time (including after the close of the Minting of the NFT Domains. If the Distributors discovers that the purchaser of Blockchain Domains violate this Agreement or any Anti Money laundering, counter-terrorism financing or other regulatory requirements, purchase of Blockchain based NFT Domains under the Crowdsale shall be invalid with retrospective effect and the Distributors shall be entitled to immediately terminate this Agreement with the Purchaser, deny access to the Minting, reject delivery of any NFT Domains.
- (g) you agree and acknowledge that in the case where you wish to purchase any NFT Domains, the NFT Domains are not to be construed, interpreted, classified or treated as:
  - (i) any kind of currency other than cryptocurrency;
  - (ii) debentures, stocks or shares issued by any person or entity (whether Quik.com and/or the Distributor)
  - (iii) rights, options or derivatives in respect of such debentures, stocks or shares;
  - (iv) rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;
  - (v) units in a collective investment scheme;
  - (vi) units in a business trust;
  - (vii) derivatives of units in a business trust; or
  - (viii) any other security or class of securities.
- (h) you are fully aware of and understand that you are not eligible to purchase any NFT Domains if you are a citizen, resident (tax or otherwise) or green card holder of the United States of America or a citizen or resident of the Republic of Singapore or a citizen or resident of People's republic of China or a citizen or resident of Republic of India;

(i) you have a basic degree of understanding of the operation, functionality, usage, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain-based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology;

(j) you are fully aware and understand that in the case where you wish to purchase any Blockchain Domains, there are risks associated with Quik.com and the Distributor and their respective business and operations, the NFT Domains, the Blockchain Domain Names, the Minting of NFT Domains, and the Quik.com Marketplace (each as referred to in the Whitepaper);

(k) you agree and acknowledge that neither Quik.com nor the Distributor is liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you; and

(l) all of the above representations and warranties are true, complete, accurate and nonmisleading from the time of your access to and/or acceptance of possession this Whitepaper or such part thereof (as the case may be);

#### **CAUTIONARY NOTE ON FORWARD-LOOKING STATEMENTS**

All statements contained in this Whitepaper or Quik.com website, statements made in press releases or in any place accessible by the public and oral statements that may be made by Quik.com and/or the Distributor or their respective directors, executive officers or employees acting on behalf of Quik.com or the Distributor (as the case may be), that are not statements of historical fact, constitute "forward-looking statements". Some of these statements can be identified by forward-looking terms such as "aim", "target", "anticipate", "believe", "could", "estimate", "expect", "if", "intend", "may", "plan", "possible", "probable", "project", "should", "would", "will" or other similar terms.

However, these terms are not the exclusive means of identifying forward-looking statements. All statements regarding Quik.com's and/or the Distributor's financial position, business strategies, plans and prospects and the future prospects of the industry which Quik.com and/or the Distributor is in are forward-looking statements. These forward-looking statements, including but not limited to statements as to Quik.com's and/or the Distributor's revenue and profitability, prospects, future plans, other expected industry trends and other matters discussed in this Whitepaper regarding Quik.com and/or the Distributor are matters that are not historic facts, but only predictions.

These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual future results, performance or achievements of Quik.com and/or the Distributor to be materially different from any future results, performance or achievements expected, expressed or implied by such forward-looking statements. These factors include, amongst others:

(a) changes in political, social, economic and stock or cryptocurrency market conditions, and the regulatory environment in the countries in which Quik.com and/or the Distributor conducts its respective businesses and operations;

(b) the risk that Quik.com and/or the Distributor may be unable or execute or implement their respective business strategies and future plans;

- (c) changes in interest rates and exchange rates of fiat currencies and cryptocurrencies;
- (d) changes in the anticipated growth strategies and expected internal growth of Quik.com and/or the Distributor;
- (e) changes in the availability and fees payable to Quik.com and/or the Distributor in connection with their respective businesses and operations;
- (f) changes in the availability and salaries of employees who are required by Quik.com and/or the Distributor to operate their respective businesses and operations;
- (g) changes in preferences of customers of Quik.com and/or the Distributor;
- (h) changes in competitive conditions under which Quik.com and/or the Distributor operate, and the ability of Quik.com and/or the Distributor to compete under such conditions;
- (i) changes in the future capital needs of Quik.com and/or the Distributor and the availability of financing and capital to fund such needs;
- (j) war or acts of international or domestic terrorism;
- (k) occurrences of catastrophic events, natural disasters and acts of God that affect the businesses and/or operations of Quik.com and/or the Distributor;
